

## QUIZ #4

**Class:** `RightAlignedStars.java`

**Prerequisites:** Java ACM Task Force, loops (inner loop)

**Description:** Write a program that displays lines of right aligned stars with increasing number of stars; starting from 1 star at the first line, 2 stars at the second line, etc. You need to get the number of lines from the user as input. In the sample run we enter 8 as line number and you can see the resulting stars.

**Sample Run:**

```
File Edit
Enter the level height:
8
      *
     **
    ***
   ****
  *****
 *****
*****
*****
```
