Introduction to Programming

with Java

Class: ReverseFile.java

Score: ★★★

Prerequisites: Java ACM Task Force, BufferedReader, I/O Exceptions

Description: This program reverses the lines in a file by reading them into an array, and then printing the lines of the array in reverse-order.

Sample Run:

```
Applet Viewer: ReverseFile.class                          _ □ X
  Applet
This program reverses the lines in a file.
Enter input file: reverse
Can't open that file.
Enter input file: reverse.txt
In the cauldron boil and bake;
Eye of newt and toe of frog,
Wool of bat and tongue of dog,
Adder's fork and blind-worm's sting,
Lizard's leg and howlet's wing,
For a charm of powerful trouble,
Like a hell-broth boil and bubble.
Double, double, toil and trouble;
Fire burn and cauldron bubble.

Enter input file: reverse.txt
This program reverses the lines in a file.

Applet started.
```
